

Product Specification - High Performance GU10 5.5W

Description

The Uni-light GU10 is a high performance directional LED light. Its carefully designed heat-sink and choice of lens makes it an ideal candidate for a number of industrial and commercial applications. From only 5.5 watts Uni-light has managed to deliver 440 lumen of light-output making this GU10 the most powerful in its class.

The same patented and energy-efficient circuitry developed for our 6W 'A' series light has been adapted for use in this compact directional lamp. The GU10 is fully dimmable and benefits from thermal management circuit that ensures long LED life, in excess of 50000hrs.

Available in either flat lens (120 degrees) or bullseye (30 degrees) the Unilight GU10 can be used where directed light is important and where heat generation needs to be minimised.

Colour temperature is Warm White in the range 2700—3000K.

The savings achievable for hotels, retail shops, malls, showrooms and reception areas enable a very short pay-back period.

Like all other Uni-light products the GU10 lamp benefits from a 5 year warranty.

Product Specification - High Performance GU10 5.5W

Flat lens 120 deg

Model Number	ULGU10-240-6	ULGU10-240-6
Rated Power W	5.5	5.5
Rated Voltage W	220/240	220/240
Light Output Lm (equiv Watts)	440lm (65W) 546cd	440lm (65W) 546cd
Lens	Flat	Bullseye
Beam Angle deg	120	30
Colour temperature K	2700 – 3000	2700 – 3000
Dimmable %	100	100
LED working life hrs	50,000	50,000
Colour	Warm White	Warm White
Diameter mm	50	50
Length mm	70	70
Warranty Yrs	5	5
Weight g	60	70

Bulls-eye lens—30 deg
